## FRONT END DEVELOPER

---

Full-stack software engineer and graphic designer. Creative problem solving is my passion. Results-driven and motivated with experience in testing and debugging existing software and web development. Consistently regarded as a hands-on, detail oriented leader.

## TECHNICAL & INTERPERSONAL SKILLS

---

**Languages:** JavaScript, HTML, CSS, Typescript, EJS, Node.js

**Libraries and Frameworks:** Express.js, Bootstrap,

**Databases and other:** MongoDB, RESTful Routing, JSON API

## TECHNICAL PROJECTS

---

**Clue Three - [GitHub](#) | [Demo Video](#) | [App](#)**

**JavaScript | HTML | CSS | Adobe Illustrator | Adobe Photoshop**

*A guessing game where you can input questions to reveal clues—an inquisitive thinker's playground.*

- Connected the Google Maps API to allow for users to input their distance radius
- Pulled from the Yelp API to gather a list of local restaurants and ratings
- Created secure login using OmniAuth

**Polling App - [GitHub](#) | [Demo Video](#) | [App](#)**

**JavaScript | Express.js | EJS | CSS**

*An app where user can submit and answer polls with a detailed look into poll results.*

- Built a fully functional application using Express.js, EJS, and MongoDB
- Styled a consistent and polished frontend user interface that offers a positive user experience, including accessibility features
- Created secure login using Google OAuth

## EXPERIENCE

---

**Twitch**

Atlanta, GA

**Content Creator**

05/2020-10/2022
